Each Trip Backroads is unique and this one is no exception. Day 1- In the mountains! - We choose you from your Calgary Calgary Hotel, or the Marriott Downtown Hotel if you're flying in today. Pickup is between 3:30 and 4 pm. Once we met everyone we head west 1.5 hours to the visible mountains from Calgary. Watch the dramatic changes as the scenery goes from tower prayers to an span of 15 minutes. We get you checked into your hotel and then walk down the street for our first dine as a group. During dinner we talk about the coming days and what to expect during your hiking trip to Banff. Day 2 - Pioneer and Swiss Montaine - After a complimentary breakfast at the hotel we expect to be in the wind and top 45 minutes north of the world Lake Louise. Once you've taken too many photos of the morning soft light on Victoria Glacier, we start up our trail for the day. We're going to ride up to Lake Agnes Teahouse, and then where most people would turn around, we continue around the lake and on top of Big Beehive, for a bird's-dropping eye in Lake Louise. Continue on the Highline Connector, take us to Plain at Six Glacier Teahouse, where you'll be rewarded with close and personal views of the glaciers hanging on the cliffs all around us. If we're lucky, the morning sun will heat the ice, causing the massive ice circuit of ice to fall off the mountain with a round iron roar, a distance safely away but close enough to feel the reverence under your feet. Enjoy a tea in the tea house during your guide fills you through the histories of early Swiss mountains that influence life in these mountains. If you're lucky, you can even feast on some Swiss Unfounded to make this extra special moment (and delicious). After a dinner in town we head as a group of water to calm Souphur Mountain Hot Springs. These are the same hot spring that first attracted train officials in this area, resulting in national conservation efforts and bringing first Western tourism to Canada. These are also the same waters that the local indigenous tribes have traveled in and recovery to the water that can heal for thousands of years. Day 3 - Best of Banff -- Today we headed out for one of the most scenic hikes in the Banff area. This usually should be Cory Pass or Alymer Pass, where your hard work is rewarded with stunning views of Lake Minnewanka, or Banff far below your feet. Cory Pass is really cool because you feel like a cal, walking right beside two miles of high cliffs feet on either side of you! After the hike we went back to the city and we have a delicious dinner as a group and in the evening you have the choice for you free time to relax, or to go for an evening tour via Johnston Canyon. Johnston Canyon is crawling with crowd by day, but with our unique idea of a night market, you'll be virtually alone in the canyon, learning about how the water has needed the rock over the past ten thousand years and rise close and personal with a waterfall. Day 4 - Moraine Lake and beyond!!! - Wake up bright early so we can find Moraine Lake in the morning light picture time that immerse the Value in Ten peaks at a soft bar. Once you've made a feast of your eye on the water impossibly blue and the puck roar all around, we head up our trail to Eiffel Lake or Sentinel Pass. From Eiffel Lake you can participate traveling just a bit further to Wenkchemma Pass, where you can set a stake in British Columbia with one foot in Alberta. From Sentinel Pass you can take the Instagram photo of a lifetime, while looking down in Larch Valley and Paradise Valley at the same time. Both hikes are so incredible, the hardest part for being a guide is choosing which one does! After us our travelers continue to Golden, where we stay for the next 3 nights. Day 5 - In Awe of Yoho -- Did you know that Yoho is an indigenous term for the feeling of fear? Well today we'll prove that you are on a guided tour of Yoho National Park. We start off by hiking one of two amazing trails: Paget lookout in a fiery historical view and resemble Fire Views Worthy, or IceLine Trail, walk directly towards a cooler and iron from a massive waterfall across the valley. After traveling the guide, relax and enjoy some of the smooth bucket attractions at the park, such as Takakaaw Falls (Canada's second highest waterfalls), and Emerald Lake (one of Canada's most beautiful lakes). Day 6 - Best to Last - Spend the last full day of your guided tour of Banff and Yoho on a truly spectacular hike in Yoho National Park, which is a huge expansion of untrammed desert. With your guides will be hiking the Trail Trail IceLine, or Hamilton Lake Trail. From here you will be completely in the heart of the mountains, likely without a single person for several miles and enthusiasm by alpine lack covered in alpine flowers. After we return to civilization you may have a soak of the hot tub and then we head out over the city for our final group dinner and this one is on us! Day 7 - Canyon, Pictographs and Calgary - Today we pack up and check out the hotel. On the way back to Calgary we have one more amazing stop in store for you, which is Grotto Canyon. We traveled 1.5 miles up this canyon spot with tower walls on either side of us, stopping to see a set of pickles left by an indigenous tribe about 1300 years ago. Next we pass through the stone field, where there are mysterious scenes of stone pillars elaborately on top of each other in an unprecedented act, then check out a waterfall with a peppercave feature before heading back to the wind and on calculated. We can drop you off at any hotel in Banff, Calgary, or the airport by about 2 pm. We chose what we consider the best of the best when it comes to finding out and spending time in the backcountry of the Rocky Mountain National Parks. From the explosion of wild flowers in the spring, to the key glacial views of the summer, in the brilliant gold of the brilliant trees of the fall, the ride to the Rockies would not be missed. Our interpretation priority will be a safe, fun and informative trip that connects you more to where you're visiting. We travel to small groups that recommend security to reduce wild encounters. Peter's time is between four and six hours, including an alphanic lunch picnic. Please note that you must have solid shoes and we recommend dressing in adapter layers to adapt to constant weather changes.
